

Basic Pasta

Ingredients:

- Dried Pasta(any will work well)
- Water
- Salt
- Tomato Puree
- Cheese/Tuna/Both/None

Method

1. Boil your pasta adding salt to the water for later on.
2. While pasta is cooking, grate your cheese/drain your tuna.
3. When the pasta is cooked add about half a tube of tomato puree, stirring well, to give you a pasta consistency. Of Course, you can just use pasta if you want and drain the pasta instead.
4. Then, add the tuna if using any, stirring it in well. Leave for a minute to heat up the tuna. Add salt/pepper to taste.
5. Serve into a bowl and sprinkle lots of cheese on top.

Enjoy!

This can be enjoyed as a simple tomato pasta, or with cheese or tuna, or both:)
